

123 Certification Inc.'s team is proud to announce the launching of its new products as well as of its new Internet site. We invite you to visit www.123arc.com.

Catch a first!!!
Launching of aluminum welding simulators during the TransAI 2005 Congress
at Delta Hotel of Trois-Rivières from June 19 to 23, 2005.

"Learning how to weld has never been so pleasant..."

All virtual, metal usage, sparks and smoke which we see as in true life but without the 3D's of welding (danger, darkness and dust). A tool allowing welding learners to be self-evaluated since it will give your results and your weld defects. Thus the **arc+** welding simulator was created ...
www.123arc.com

There will be a TransAI Congress Draw for a 6 month of membership use without expenses!!!

Come and get all benefits of a launching if you subscribe on the spot (1 month test free).

Ask us for conditions

Come and live the experience of virtual welding at booth #16!

All congressists registered at the congress are invited at booth #16. Our experts will be available on the spot to answer your questions and to make you weld virtually with the arc welding simulator.

Outdoor exposition of product !

FREE! General Admission
Exposition of the arc welding simulators **open to public.** This exposition will take place outside the Delta Hotel Congress Center on **June 22 between 10 h and 11h30 a.m..**

Conference/ arc simulator experimentation room for all TransAI congressists

All congressists registered at the congress are invited to assist at a **mini-conference** coupled with experimentation room **June 21st starting at 10h30 a.m..** Claude Choquet, president of the company and welding engineer will do a presentation of the products, and will invite you in an adjacent room to carry out simulator tests and answers to all your questions!
